PROFESSIONAL SUMMARY

Full Stack Developer with experience building scalable web applications, cloud-based systems, and real-time data pipelines. Skilled in backend API development, React-based frontend systems, and deploying production-ready solutions on Microsoft Azure. Strong focus on system design, performance, and delivering end-to-end features..

EDUCATION

NUST,College of Electrical and Mechanical Engineering, Rawalpindi, Pakistan *Sep. 2022 – Sep 2026*

Bachelor in Computer Engineering

***Courses**: Object Oriented Programming, Data Structures and Algorithms, Computer Graphics ,Operating Systems, Computer Networks , Digital Image Processing , Data Base Engineering, Artificial Intelligence and Decision Support System ,Cloud Computing , Software Engineering*

Punjab Group of Colleges, Gujranwala, Pakistan *Aug. 2020 – June2022*

FSC Pre-Engineering (%age Marks:96.9%)

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C++, SQL
Frontend: React.js
Backend: Node.js, Express.js, REST APIs
Cloud & DevOps: Microsoft Azure, Docker, CI/CD Pipelines
Databases: MongoDB
Tools: Git, VS Code, Postman, Jira

EXPERIENCE

Backend Engineer Intern | Zapply (American Startup)

May 2025 – August 2025

- Built backend logic for a Chrome extension that automates job application workflows, including data extraction and autofill across ATS platforms.
- Designed scalable APIs and data handling processes for multi-platform job scraping and structured storage .

Software Engineering Intern | Centre for Advanced Research in Engineering (CARE)

June 2025 – August 2025

- Developed a cloud-based predictive maintenance system using ML models and deployed services on Microsoft Azure.
- Built a frontend dashboard for real-time monitoring and integrated backend APIs for live sensor data processing.

TECHNICAL PROJECTS

IOT Based Predictive Maintenance System | *Final year project (in progress)*

- Designed and deployed a cloud-based system on Azure for real-time sensor data processing and anomaly detection.
- Built REST APIs and integrated them with a React dashboard for monitoring system health and predictions.

RevMatch — Academic Paper Review Management System | *React.js, Node.js, Express.js, MongoDB* |*GitHub Link*

- Developed full-stack Developed a full-stack web app with role-based authentication and automated reviewer assignment logic.
- Designed backend APIs and database schema to handle submissions, matching, and workflow management.
- database schemas for efficient paper submission and review workflows

Application Tracking Service (Chrome Extension) | *React, Node.js, Express, MongoDB* | *Github Link*

- Developed a browser extension to automatically fill job applications using stored user data.
- Implemented logic to detect page structures and dynamically populate form fields.

Chrom Autofill Extension | *React, JavaScript, Chrome Extension API* | *Github Link*

- Developed intelligent Chrome extension detecting ATS platforms and job page structures for automated form filling
- Implemented data persistence and autofill logic across multiple application form types with React-based interface

CERTIFICATIONS

CPA: Programming Essentials in C++ View Certificate
Offered by : Cisco Networking Academy
CPP: Advanced Programming in C++ View Certificate
Offered by : Cisco Networking Academy
CCNA: Introduction to Networks View Certificate
Offered by : Cisco Networking Academy
